Koolfoam XPS ...

- Is lightweight and rigid in form, making it easy to handle
- Is highly water resistant
- Is available in different thicknesses to suit your project
- Is effective at insulating both high and low temperatures
- Lowers energy consumption
- Delivers high compressive strength

Koolfoam XPS Is Ideal For Use In:

- Retaining walls
- Concrete flooring
- Interior Cladding
- Masonry walls

Koolfoam XPS technical data:

- XPS Foam comes in 2 densities.
32kg and 40 kg.
- Compressive strength on 32 kg 293 kpa @10%
- Compressive strength on 40kg 459 kpa @10%
- Thermal conductivity 0.027 W/mK
